

Opelika's Greatest Robotics Engineers

O.G.R.E. goes to WORLDS!

After a successful run at the Rocket City Regional, Opelika's O.G.R.E. is headed to the Worlds Championships in Houston, Texas!

We will be traveling Wednesday to Sunday and are hoping to bring home another great run! Wish us luck as we prepare over the next week and a half.

CanBot at Competition

Novelis // Ball

Thelonious, our CanBot, has been traveling to competitions with us this season. We are always excited to show Theo off to other teams and communities to encourage recycling. Thank you to Novelis and Ball!

If you see us at competition, feel free to add your team sticker!

Team Captain

As we gear up for Worlds, we want to spotlight our team captain! Cayson spends countless hours working in the robotics lab. He has stepped up into a valuable team leader that helps to teach, guide, and mentor every member of the team. As captain, he serves on the Drive Team at competition and embodies the values of the FIRST ethos! Thank you for your dedication, Cayson!
