

Opelika's Greatest Robotics Engineers

Off-season O.G.R.E.

Houston was good to us, but we are glad to be back in Opelika. While competition season may be over, the work never ends. We are planning and working for success during the 2024 FIRST in Show Crescendo season!

Thank you to everyone who volunteers their time with us; we appreciate you!

Member Spotlight

Human Player- Drive Team

While driving the robot is an important part of the drive team responsibilities, the human player is as well! This month, we want to shoutout our drive team's Human Player, Hadley.

Hadley competes under enormous pressure to ensure that our robot has the available components on the field. She is also a rockstar member of the team that spends countless hours helping out!

Summer Plans

Our students understand the value of summer vacation! We also instill the value of community service and outreach. You can find us working with our community this summer!

O.G.R.E. will be hosting a robotics showcase on July 19th at the Opelika Public Library. See you there!
